

Long Range Drive

Lv17

Now it is time for the first long test drive. You can use the “--speed=<factor>” argument to increase the speed of the simulation up to 100x.

Goals Summary:

- Drive a distance of 10 kilometers
- Avoid speeding tickets
- Avoid tickets for reckless driving
- Finish the test drive in under 690 seconds
- Keep the total energy usage below 6100 Wh
